

SANJANA GUPTA

New York City, NY | sanjanagupta.ds@gmail.com | +1 201-423-1697 | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Data Scientist with **2+ years** of experience leveraging **Python, SQL, Power BI**, and **Machine Learning** to automate ETL workflows, and support data-driven decision-making. Skilled in **data analysis, predictive modeling, business intelligence**, and **data visualization**, with experience across FinTech, Healthcare, and Construction industries.

EDUCATION

Stevens Institute of Technology <i>Master's, Data Science</i>	Hoboken, NJ <i>GPA 3.9/4.0</i>
Ramrao Adik Institute of Technology <i>Bachelor's, Information Technology</i>	Mumbai, India <i>GPA 3.8/4.0</i>

TECHNICAL SKILLS

Languages & Databases Python, R, SQL, MongoDB, Oracle, C/C++, JavaScript
Tools Power BI, Tableau, Excel, AWS (EC2, S3, Lambda), Flask, Git, Hadoop, Apache Spark
Frameworks & Libraries Pandas, NumPy, Scikit-learn, TensorFlow, PyTorch, Keras, XGBoost, Hugging Face Transformers
Statistics A/B Testing, Hypothesis Testing, Regression Analysis, Time Series Forecasting, Probability, Calculus
ML & AI Deep Learning, Generative AI, Supervised & Unsupervised Learning, NLP, Reinforcement Learning

PROFESSIONAL EXPERIENCE

Stealth FinTech Startup <i>Data Analyst</i>	New York City, NY Sep 2025 – Present
- Built and optimized data pipelines using Python and PostgreSQL to analyze user behavior and engagement trends for a pre-launch fintech product. - Created Power BI dashboards to visualize KPIs and streamline performance monitoring and growth planning.	
Stevens Institute of Technology <i>Graduate Research Assistant – Civil, Environmental and Ocean Engineering Department</i>	Hoboken, NJ Jan 2025 – May 2025
- Performed data analysis using time series analysis, trend detection, and multivariate statistical modeling on 10+ years of Lake Hopatcong water quality data. - Utilized Python, R, and SQL for data cleaning, modeling, and visualization to evaluate environmental health.	
OM Enterprises <i>Data Scientist</i>	Mumbai, India Oct 2021 – Jul 2023
- Orchestrated the integration of multi-warehouse datasets (ERP) for 50+ clients using Python, enhancing data consistency and reducing manual reconciliation errors by 95%, enhancing operational reliability across projects. - Automated ETL pipelines with Python and SQL to consolidate and transform warehouse and procurement data, generating interactive dashboards that accelerated reporting and decision-making by 60%. - Analyzed 100K+ SQL records to optimize resource allocation and project efficiency, using Excel & Power BI.	

HIGHLIGHT PROJECTS

Customer Segmentation for Targeted Marketing [Link](#)

- Processed transactional datasets with **Pandas** and **NumPy**, handling missing values, duplicates, and outliers.
- Segmented customers via **K-Means clustering** (Python, **scikit-learn**) using **RFM** metrics to identify clusters.
- Optimized **marketing strategies** by identifying KPIs, high-value customers, behavioral patterns, and regional trends.

Time Series Forecasting – Bitcoin Prices (Non-Seasonal data) & Airline Passenger Traffic (Seasonal data) [Link](#)

- Applied the **Box-Jenkins** methodology to model and forecast **ARIMA** and **SARIMA** datasets.
- Implemented ARIMA(0,1,0) for Bitcoin price prediction using daily aggregated OHLCV data; handled missing values, conducted **ADF stationarity tests**, and validated results with **Ljung-Box diagnostics**.
- Developed SARIMA(0,1,1)(0,1,1)[12] for airline passenger traffic, applying **log transformation** and seasonal differencing to capture **variance** and seasonal patterns with **89% accuracy**.

ACHIEVEMENTS & LEADERSHIP

Choice Award – SurgiTech (Rutgers HealthHack 2024) Automated OR scheduling Data Migration Assistant – Stevens Institute of Technology Contentful, Excel, Data Compliance Hackathon Team Lead – NYU, Rutgers, Stevens Multiple MVPs delivered in under 48 hours Graduate Peer Leader – Graduate Student Life at Stevens Institute of Technology
